AUSTRALIAN PERFINS - THE GOVERNMENT OF VICTORIA by Roy Everett

Having read the article by Jon Johnson in Issue 226, and with a quick to the excellent booklet produced by B. R. V. specifically this subject, following said follow on the can be in up to the previous aforesaid article:

On Victorian Government perfins there are four distinct types eight positional placements the dies have up to on viewed from the front, upright, inverted, upright inverted, inverted downwards, sideways sideways downwards reversed. reversed. sideways upwards, sideways upwards reversed.

The dies are listed 1 to 4 with the following particulars:

Type 1: VG 9,10 used from 1933 to 1953.

Type 2: VG 9,11 used from 1936 to 1953 in combination with Type 1

Type 3: VG 7,10 used from 1953 to 1972. Type 4: VG 9,11 used from 1976 to date.

In the highly recommended booklet Mr. Toop than proceeds to write about the machines used to perfin stamps with VG and illustrates the machine idle and in usage actually carrying out such perforating. 1 to 4 in Subsequently are listed **Types** all the SO far discovered positional placements from the eight above lettered A to H, and also are given the stamp catalogue numbers and descriptions of all these issues.

At the back, in an Appendix, Mr. Toop then illustrates the methods of entering the sheets into the perfinning machines, detailing how the positional placements were effected in the process.

those collectors interested in finding out more about this States perfins. and solving exactly which of the processes produced the Figs. and 2 of Mr. Johnson's article, then you can acquire the booklet directly from:

B.V.R Toop 2 Baxter Street Timboon The cover cost of the booklet is A\$6.00 and Air post on top of that must be considered.

Vic. 3268 Australia

As Mr Toop states, 'the dies were Individually manufactured and varied one from another so that each die can be Identified by looking punctured stamps', and 'Type 1 had twelve dies but replaced after just 3 years with a new complete head of twelve dies of sixth and twelfth were with G's of which the third, 11 holes. For long considered 'wallpaper' perfin collectors this brief review of by the VG perfins should stimulate you into a) collecting them in their b) thinking about finding and writing up own right, and, the issues of Australian the other States perfins to the same comprehensive standard.
